T H E
P R E F A C E.

AS it is my Intention to be as concise and intelligible as possible in this small Treatise, I shall omit laying down the Plan whereon these TABLES are constructed, and only observe that if at first Sight they should appear a little strange, as being out of the common Road of Calculation, a little Reason and Reflection in the Course of performing any Operation, will entirely remove any seeming Difficulties. I have in the EXPLANATION and USE of them endeavoured to be quite explicit and clear, having at the same time shewn how the TABLES of STOCKS will answer Pounds, Shillings and Pence the same as if they had been calculated in Natural Numbers, due Regard being had to reduce the Parts after the Number of Pounds, Shillings or Pence are taken out, and have by way of a Check at the End of the STOCK-TABLES added a Table of PARTS or RESIDUALS, to shew their Value in Shillings, Pence, and Farthings, in all Cases that can happen.

I CAN with no less Confidence than Pleasure assure my Friends and the Public, that these TABLES may be really depended upon for their Exactness, being very sensible that unless a Work of this Nature is correct, it can be of no manner of Use, and the extraordinary Pains and Care I have been at, in order to render it so, has (in a great Measure) retarded its Publication. And as some of my particular Friends, who have used Part of this Book in detached Pieces, in transacting Matters of real Business have acknowledged its Usefulness, I flatter myself if the Public should adjudge it any Degree of Merit, it will meet with a suitable Encouragement.

The EXPLANATION of the TABLES.

THESE Tables, beginning at 60 *per Cent.* are continued in a regular Order, comprehending all the intermediate Eighths from 60, 60 $\frac{1}{8}$, $\frac{1}{4}$, &c. as far as £ 130 *per Cent.*

The Numerical Figures under Letter N (denoting Number) by adding a Cypher or Cyphers to them, will denote the following Numbers.

N	£	£	£	£	&c.
Thus 1 will denote	1	10	100	1000	&c.
2 — —	2	20	200	2000	
3 — —	3	30	300	3000	
4 — —	4	40	400	4000	
5 — —	5	50	500	5000	
6 — —	6	60	600	6000	
7 — —	7	70	700	7000	
8 — —	8	80	800	8000	
9 — —	9	90	900	9000	

And in like manner they may be used to express Shillings, Pence and Farthings, if required.

The above Numbers are called simple or pure Numbers.

Compound Numbers are made up of simple or pure Numbers, and may be expressed by the above Scheme, due Regard being had to the ranging them in their proper Order.

Let it be required to express in pure Numbers the compound Number 1234, or £ 1234. Here it is evident that £ 1234 is made up of the simple or pure Numbers £ 1000, £ 200, £ 30, and £ 4, which set in Order and added together as under, make the compound Number 1234, or £ 1234.

Thus £ 1000
200
30
4

Total £ 1234

And again, Let it be required to express £ 8206.

£ 8000
200
6

£ 8206

This is so plain, that more Examples would be needless.

Against the Numerical Figures are severally contained a Set of Numbers that will answer any Stock required, whether Pounds, Shillings, Pence or Farthings, due Regard being had to the placing them in a proper Order.

The USE of the TABLES.

EXAMPLE I.

WHAT Stock will £300 purchase, at $78\frac{1}{8}$ per Cent. ?
 To solve which Question turn to the Tables for buying Stocks, and seek for $78\frac{1}{8}$ per Cent. Then look for the Numerical Figure 3 and against it you will find 3840000, which on the least Reflection, can be considered to denote no more than £384, as £300 at $78\frac{1}{8}$ per Cent. could not in reason purchase a larger Stock. for it would be absurd to imagine that £300 could purchase £3840, but rather £384.

EXAMPLE II.

What Stock will £3300 purchase at the same Rate, viz. $78\frac{1}{8}$ per Cent.

Write down the Sum as under.

£ 3000	will purchase	£ 3840
300	— — — —	384

Therefore £ 3300	will purchase	£ 4224	Stock.

N. B. In reducing the Parts of a Pound by 20 and 12, you must always point off 3 Figures to the right Hand.

O R,

You may find the Value of the Parts in the Table of Refiduals at the End of the Stock Tables; for over 321 Parts you will find 6s. and in the side Column against the Parts $5\frac{1}{4}d$.

Before I give any more Examples I shall shew how to reduce the Parts of a Pound by Inspection.

R U L E.

Divide the Parts by 50 and the Quotient will be Shillings, and the Remainder will be Farthings.

Reduce the Parts 321 by 50.

N. B. You may reduce the Parts of Shillings by Inspection, by the following Method.

R U L E.

After you have taken out the Number of Shillings, halve the 2 next Figures in the Parts, and call them Farthings; as in the foregoing Example.

Value 83 Parts of a Shilling.

The half of 83 is 41, or 41 Farthings, or 10 Pence, because I abate 1, as per Rule aforegoing.

Also Value the Parts 97.

The half of 97 is 48, or 48 Farthings, abating 2, per Rule aforegoing, leaves 46 or $11\frac{1}{2}$ d.

EXAMPLE VII.

What Stock will 9d. purchase, at $79\frac{1}{4}$ per Cent.?
